WEATHER KEY POINTS

02/25/22 - 03/03/22

Friday - Thursday

- One more round of temperatures near or below freezing is expected for much of the state Friday morning, with temperatures forecast to warm considerably through the weekend and much of next week
- Gusty offshore Santa Ana winds are expected across the southern California mountains, foothills, and coastline on Saturday, with gusts of 35 to 50 mph
- Mainly dry weather is expected for much of central and southern California through the weekend and much of next week, while some light precipitation is likely to impact northern California at times Sunday through Thursday. Some light snow is also possible over the northern Sierra by midweek.

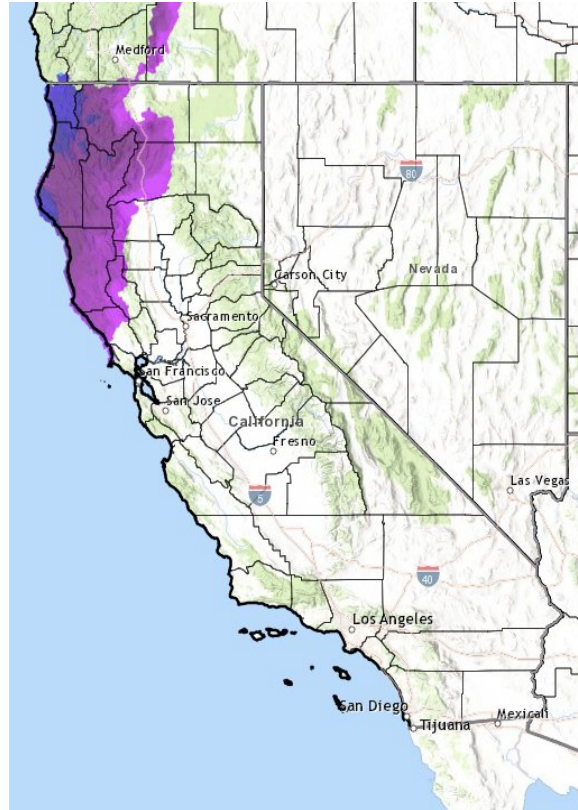

PRECIPITATION FORECAST

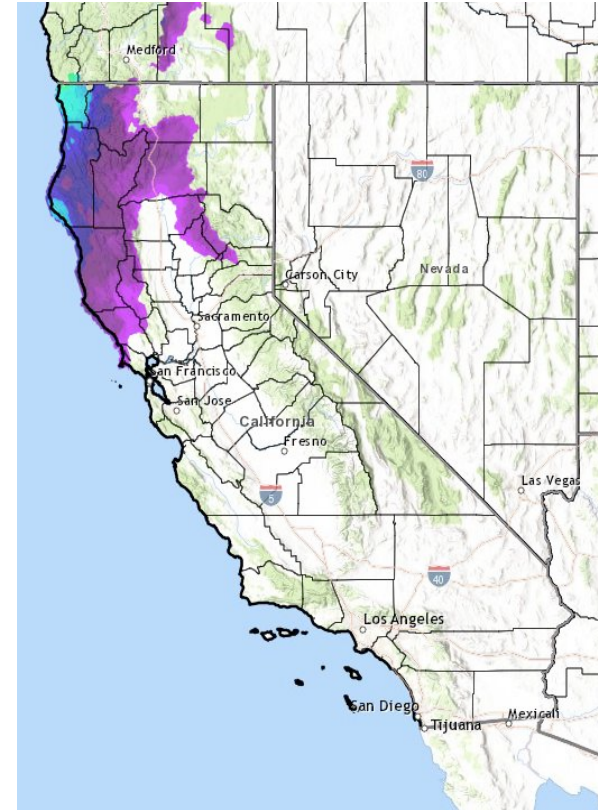

02/25/22 - 02/27/22

Friday

Saturday

Sunday

Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

Precipitation (inches)

WEATHER OUTLOOK

03/02/22 - 03/10/22

6-10 Day Outlook (March 2 - March 5)

Temperatures

- Below normal temperatures are favored across northern California, with near normal readings favored for central parts of the state and above normal temperatures favored across far southern California

Precipitation

- Below normal precipitation is favored for much of the state, except for far northern California where near normal precipitation is favored

8-14 Day Outlook (March 4 – March 10)

Temperatures

- Below normal temperatures are favored statewide

Precipitation

- Below normal precipitation is also favored for much of the state, with the exception of areas closer to the Nevada/Arizona border where near normal precipitation is favored
